

Project Profile

Client:

First Church of Christ

Design Professional:

William Hirsh, AIA

Location:

Newark, DE

Delivery Method:

General Contracting

Key Challenges:

- To provide the client with cost savings through value engineering in order to meet their budgetary needs.

First Church of Christ

The First Church of Christ project called for a high style look within a tight budget. Bancroft's value engineering study yielded options that cut costs while maintaining quality and aesthetics. This new structure was a community focal point. The large entrance way and worship area accommodated a larger congregation helping the church to increase their membership and provide additional services.
