

Project Profile

Client:
University of Delaware

Pencader Dining Hall

Design Professional:
Delaware Engineering & Design Corp.

Location:
Newark, DE

Delivery Method:
General Contracting

Key Challenges:

- To coordinate and execute renovations to the Pencader Dining Hall kitchen during winter session - a five week period when the campus is much less crowded

The Project Team removed all existing kitchen equipment along with the existing services that feed the equipment. A new flooring system was installed and new trench drains were added in order to support the new kitchen equipment and the revised layout. All of the mechanical, plumbing and electrical services were replaced and relocated as necessary in order to re-feed the new equipment. Additional hand sinks and grease interceptors were installed to meet the Department of Health requirements.
