

Project Profile

Client:

University of Delaware

Wyoming Road

Design Professional:

Anderson, Brown & Higley Associates

Location:

Newark, DE

Delivery Method:

Design-Build

Key Challenges:

- To construct a new office building on an existing slab

Purchased by the University of Delaware from Astro Power, Wyoming Road was demolished leaving only the metal skeleton and cement slab. The new exterior included new siding, windows, roof and exterior doors. Two-thirds of the 30,000 square foot building was designated as office space and the remaining space was utilized for storage. Interior walls were constructed to create comfortable offices for staff and administration creating a definite separation between the offices and storage areas.
