CAMP Rehoboth, Inc.

CAMP Rehoboth

Design Professional:
Hillier Group

Location:
Rehoboth Beach, DE

Delivery Method:
Construction Management

Key Challenges:

- To complete an addition and renovation project within a fully operational facility

This project included a 2,500 square foot community center expansion including multipurpose room, kitchen, restrooms, workrooms, and multiple decks. A second story was added to the building in order to house mechanical equipment. The project was located in the busy resort town of Rehoboth Beach, Delaware, with setbacks of only inches on either side between buildings. This made site management extremely challenging. The Team completed the work successfully without disrupting the surrounding businesses as well as without compromising the safety of nearby pedestrians.
