Client:

AstraZeneca Pharmaceuticals

AstraZeneca Newark Campus

Design Professional:

Various

Location:

Wilmington, DE

Delivery Method:

Construction Management

Key Challenges:

- To serve as the Construction Manager and Owner's agent on multiple projects at AstraZeneca's Newark site.

Through an ongoing alliance agreement, Bancroft serves as the CM and Owner's agent on multiple projects at the AstraZeneca Newark Campus where pharmaceuticals are manufactured and packaged. The scopes of the projects include, but are not limited to, a major renovation to a Sterile Products Facility (SPF) where potent antibiotics are manufactured/packaged, a building addition to the Incoming Quality Assurance (IQA) Facility where the purity of the pharmaceutical compounds are verified prior to release for use in the production lines, process area renovations, lab equipment installations, and office additions and renovations.

Projects under Bancroft's management have enabled AstraZeneca to minimize scheduled outages, therefore decreasing downtime in various pharmaceutical production areas.
