

Project Profile

Client:
Elwyn, Inc.

Elwyn

Design Professional:
ArQitecture

Location:
Wilmington, DE

Delivery Method:
General Contracting

Key Challenges:

- To construct an addition within an occupied correctional facility while adhering to the rules and guidelines established by the Warden.

Interior renovations included four workshop areas within the building (floors, ceilings painting, shades, lighting), renovation of the restrooms on the first and second floors in order to make them ADA compliant, and the replacement of doors and hardware. Exterior work included the installation of helical coils for differential settlement, the replacement of concrete sidewalks and curbing, drainage repairs and parking lot replacement.
