

Project Profile

**Client:**  
Vicmead Hunt Club

## Vicmead Hunt Club

**Design Professional:**  
Moeckel Carbonell Associates

**Location:**  
Wilmington, DE

**Delivery Method:**  
Construction Management

**Key Challenges:**

- To provide a first-class indoor tennis and squash facility within the budgetary and schedule requirements of Vicmead.

The Vicmead Hunt Club features state-of-the-art tennis courts designed to incorporate a reflective insulation system. The indoor squash courts are housed in a custom-designed pre-fabricated metal building, which was fabricated to allow for the courts, which have specific dimensions. This called for a modification of the original building design. Rather than incur the expense of a dedicated fire suppression system, the Bancroft Project Team worked closely with the designers in order to utilize the existing swimming pool as a feed to a fire hydrant line in the event of a fire. This resulted in an innovative and cost efficient approach to a viable fire suppression system.
