

Client:
Central Delaware Branch YMCA

YMCA - Central Delaware Branch

Design Professional:
Moeckel Carbonell Associates

Location:
Dover, DE

Delivery Method:
General Contracting

Key Challenges:

- To expand the services and amenities of Central Delaware's YMCA facility without disrupting their ongoing operations.

A state-of-the-art fitness facility was added to the existing Central DE YMCA which included a new 8 lane indoor competition pool, full service fitness center, locker/shower rooms, and advanced HVAC and electrical systems. In addition, Bancroft provided extensive site improvements such as new parking areas and entrances. Through pre-project planning and impeccable coordination, the construction of this 17,000 square foot facility took place without any disruption to the daily operations of the existing YMCA facility and was completed according to the YMCA's budget.
