

Project Profile

Client:

Longwood Gardens

Design Professional:

Design Collective

Location:

Kennett Square, PA

Delivery Method:

Construction Management

Key Challenges:

- To complete exterior and interior renovations to Longwood's Terrace Restaurant in order to modernize the outdated facility.

Terrace Restaurant

The Terrace Restaurant project involved two phases. During Phase I, Bancroft completed a roof replacement and various exterior architectural finishes. Phase II focused on the interior, transforming the restaurant that had become outdated and utilitarian into a unique and diverse space featuring a cafeteria style food service area with a new serving line and self serve refrigerated units, multiple eating areas, a conference/meeting area, and an elegant formal full-service dining room. Bancroft replaced carpet, tile, paint, wall paper, lighting, and countertops throughout the building.

The building's restrooms were completely redesigned to be ADA compliant as well as remodeled to include new lighting, countertops, partitions, floors and wall tile. In addition, Bancroft installed state-of-the-art audio/visual systems in two areas in order to provide video conferencing capabilities.

In December of 2010, the Terrace Restaurant earned a Certified Green Restaurant® rating through Green Restaurant Association.
